lab 5: simple electrical circuits - bbips

lab 5: simple electrical circuits introduction: in this laboratory you will explore simple dc (direct current) electrical circuits. the primary goal of the lab will be to develop a model for electricity. a model is a clear mental picture that helps to explain how a physical system behaves and allows you to correctly predict what will happen in

materials that cause static electricity

a) certain colored clothes attract static electricity. b) wearing clothes causes static electricity. c) certain materials rubbing against your skin cause static electricity 8. what is a major cause of getting static electricity shocks? a) buildup of charges due to dry skin rubbing on clothes. b) sitting too close to the television set.

history of electricity - need

history of electricity starting with ben many people think benjamin franklin discovered electricity with his famous kite-flying experiments in 1752. franklin is famous for tying a key to a kite string during a thunderstorm, proving that static electricity and lightning were indeed, the same thing. however, that isn't the whole story of

intro to electricity - nyu tandon school of engineering

- in electrical circuit, a switch is used to turn the electricity on and off just like a valve is used to turn the water on and off. •there are times when you want some water but don't need all the water that the pipe can deliver, so you control water flow by adjusting the faucet.
- unfortunately, you can't adjust the
